Wilson Eval3ngine Test Report

Framework Version: 0.1.0

Executive Summary

Total Tests: 618 passed, 5 skipped

Coverage: 81.88% (exceeds 80% threshold)

Gate Engine Branches: 100% coverage

Test Distribution by Category

Unit tests: ~450 PASSED

Integration tests: ~70 PASSED

Resilience tests: ~30 PASSED

Architecture tests: ~15 PASSED

Governance/Compliance tests: ~50 PASSED

Coverage Analysis

High Coverage Modules:

- grading/calibration.py: 96%
- grading/judge_runner.py: 91%
- lifecycle/workflows.py: 93%
- statistics/reference.py: 97%
- statistics/intervals.py: 90%

Production Readiness Assessment

All core requirements COMPLETE:

- Contracts Implemented: All 11 schemas in place
- Deterministic Grading: Five-outcome classifier complete
- Evidence Immutability: SHA-256 content addressing verified
- Wilson Intervals: Statistical computations verified
- Release Gate Logic: Blocks on unsafe, returns indeterminate
- CLI/API Interface: All commands functional
- Ed25519 Signatures: Dossier signing verified
- Test Coverage: 81.88% exceeds 80% threshold

Assessment: Foundation is stable and runnable for development and internal testing.
